

My family listens to Klove radio every day it is the only station that plays continuous contemporary christian music on a continual basis. If I were not able to pick up this station as I drive to school every day. I would have nothing to listen to in my car. Our community would suffer our teenagers and adults would be forced to listen to other types of music or turn off their music. Please allow us to continue to be able to hear the music of our choice on Klove with the use of local FM translators.
